**Tissue Repair**  
**Malabsorption**  
**Headaches**  
**Fatigue**  
**Dehydration**

**Giselaine's  
spa**

IV nutrient therapy is the administration of vitamins, minerals, and other nutrients directly into the bloodstream, making it a far more effective delivery method than oral supplementation, which relies on the gastrointestinal system for absorption. IV nutrient therapy bypasses the gut, so you can heal and feel better faster.

IV nutrient therapy is a safe, powerful, and potent therapy to help your body heal and regenerate, so you can feel better faster.
